INTERNATIONAL CONFERENCE ON MULTIDISCIPLINARY STUDIES AND EDUCATION: a collection scientific works of the International scientific conference – London, England, 2025. Issue 4

Languages of publication: Uzbek, English, Russian, German, Italian, Spanish

The collection consists of scientific research of scientists, graduate students and students who took part in the International Scientific online conference «**INTERNATIONAL CONFERENCE ON MULTIDISCIPLINARY STUDIES AND EDUCATION**». Which took place in London , 2025.

Conference proceedings are recommended for scientists and teachers in higher education establishments. They can be used in education, including the process of post - graduate teaching, preparation for obtain bachelors' and masters' degrees. The review of all articles was accomplished by experts, materials are according to authors copyright. The authors are responsible for content, researches results and errors.

The importance of language games in teaching English

Department of Foreign Languages for Preschool and Primary Education.

ANNOTATION. This paper examines the significance of language games in the process of teaching English as a foreign language. Language games are considered one of the most effective interactive strategies that increase students' motivation, enhance their communication skills, and promote active participation in the classroom. Through well-designed games, learners practice vocabulary, grammar, pronunciation, listening, and speaking in a meaningful and enjoyable way. The paper also highlights various types of language games, their pedagogical benefits, and examples of how they can be integrated into different stages of an English lesson.

KEYWORDS: Language games, communicative competence, motivation, interactive teaching, student engagement, vocabulary development, active learning.

Language games have become an essential component of modern English language teaching due to their ability to create a dynamic and motivating learning environment. They transform traditional lessons into interactive sessions that encourage learners to communicate, collaborate, and think critically.

Firstly, language games help reduce stress and increase students' confidence. Many learners hesitate to speak English due to the fear of making mistakes. Games create a relaxed atmosphere where errors are viewed as a natural part of learning. As a result, students participate more actively and show greater willingness to speak and experiment with new language structures.

Secondly, language games support the development of communicative competence. Games such as role-plays, pair-work activities, quizzes, storytelling, and problem-solving tasks encourage students to use English for real communication. These tasks improve fluency, listening comprehension, and speaking accuracy, while also helping learners develop social skills such as cooperation, turn-taking, and effective interaction.

Thirdly, language games make vocabulary and grammar practice more meaningful. Instead of memorizing words mechanically, students learn new vocabulary in context, which improves long-term retention. Grammar games allow learners to apply rules through fun activities such as sentence races,

puzzle tasks, grammar auctions, and matching games. This not only strengthens understanding but also boosts motivation.

Moreover, language games provide opportunities for differentiated learning. Students with different learning styles—visual, auditory, or kinesthetic—benefit equally from game-based tasks. Games also allow teachers to assess students' skills in an informal and natural way.

In conclusion, language games play a vital role in enhancing the effectiveness of English language teaching. They promote active learning, increase motivation, and support the holistic development of language skills. Incorporating well-structured games into English lessons helps build confident, capable, and communicatively competent learners.
