**INTERNATIONAL CONFERENCE ON SUPPORT OF MODERN SCIENCE AND INNOVATION:** a collection scientific works of the International scientific conference – Madrid, Spain, 2025, Issue 4.

**Languages of publication:** Uzbek, English, Russian, German, Italian, Spanish,

The collection consists of scientific research of scientists, graduate students and students who took part in the International Scientific online conference «**INTERNATIONAL CONFERENCE ON SUPPORT OF MODERN SCIENCE AND INNOVATION**». Which took place in Spain, 2025.

Conference proceedings are recommended for scientists and teachers in higher education establishments. They can be used in education, including the process of post - graduate teaching, preparation for obtain bachelors' and masters' degrees. The review of all articles was accomplished by experts, materials are according to authors copyright. The authors are responsible for content, researches results and errors.

## **THE IMPORTANCE OF LANGUAGE GAMES IN TEACHING ENGLISH.**

Humanities, Instructor **Eshquvvatova Gulasal**

**Annotation:** This thesis examines the importance of language games in teaching English as a foreign language. It highlights how games can significantly enhance student motivation, reduce learning anxiety, and create an interactive classroom atmosphere that supports natural language acquisition. The study analyzes the role of games in developing vocabulary, grammar, listening, speaking, and pronunciation skills. It also explores the cognitive, social, and emotional benefits of game-based learning and emphasizes the need for teachers to thoughtfully integrate games into lessons. The findings demonstrate that language games are an effective pedagogical tool that promotes active participation and improves learners' communicative competence.

**Аннотация:** В данной диссертации рассматривается важность языковых игр в преподавании английского языка как иностранного. Утверждается, что игры могут значительно повысить мотивацию учащихся, снизить тревожность при обучении и создать интерактивную среду в классе, способствующую естественному усвоению языка. В исследовании анализируется роль игр в развитии словарного запаса, грамматики, аудирования, говорения и произношения. Также рассматриваются когнитивные, социальные и эмоциональные преимущества игрового обучения и подчеркивается необходимость тщательной интеграции игр в уроки. Результаты исследования показывают, что языковые игры являются эффективным педагогическим инструментом, способствующим активному участию и развитию коммуникативной компетентности учащихся.

**Keywords:** Language games; motivation; communicative competence; vocabulary development; grammar practice; student engagement; interactive learning; game-based learning.

**Ключевые слова:** Языковые игры; мотивация; коммуникативная компетенция; развитие словарного запаса; грамматическая практика; участие учащихся; интерактивное обучение, игровое обучение.

**Introduction:** In modern English language teaching, creating an interactive and engaging learning environment has become a major priority. One of the most effective ways to achieve this is through the use of language

games. Games introduce joy, competition, and meaningful interaction into the classroom, which help students overcome language barriers and participate more actively. Unlike traditional methods, language games place learners at the center of the learning process and make language practice more natural and enjoyable. Because of these advantages, games are increasingly recognized as essential tools in developing students' language skills and communicative competence.

### **1. The Role of Language Games in English Teaching**

**Increasing Motivation and Reducing Anxiety:** Language games motivate students by making learning fun and purposeful. Many learners feel anxious or shy when speaking in a foreign language, especially in traditional classroom settings. Games reduce this stress by providing a relaxed environment where mistakes are viewed as part of the learning process. Students become more willing to participate, speak, and experiment with new language forms. Communicative competence — the ability to use language effectively in real-life situations — is one of the main goals of language teaching. Games naturally encourage communication by requiring students to share information, solve problems, negotiate meaning, or complete tasks together. Activities such as role-plays, information-gap games, and storytelling games simulate real conversations and provide meaningful speaking practice.

### **2. Language Games for Vocabulary and Grammar Skills**

Vocabulary games help learners understand, recall, and use new words more efficiently. Games like "Word Chain," "Flashcard Race," "Memory Game," and "Find Someone Who" promote repetition and contextual practice. Because vocabulary is learned through enjoyable activities, students remember words better and use them more confidently in communication.

Grammar games offer an alternative to mechanical workbook exercises. Through games such as "Grammar Auction," "Sentence Building Race," and "Correct the Mistake," students internalize grammar structures through meaningful use rather than rote memorization. This implicit learning makes grammar rules more memorable and less intimidating.

### **3. Developing Listening, Speaking, and Pronunciation**

**Listening Skills:** Games require students to listen actively in order to follow instructions, understand clues, or respond to partners. Listening-focused games improve comprehension, concentration, and processing speed.

**Speaking Skills:** Many games prioritize verbal communication, helping learners develop fluency and accuracy. For example, role-plays require students to speak in different social situations, while problem-solving games encourage discussion, explanation, and negotiation.

**Pronunciation:** Pronunciation games, such as minimal pair competitions, sound bingo, and tongue-twister challenges, make phonetic practice fun and

memorable. These games help students differentiate sounds, improve clarity, and gain confidence in speaking.

#### **4. Social, Cognitive, and Emotional Benefits**

Language games also promote broader educational outcomes. They encourage cooperation, teamwork, creativity, and critical thinking. Students learn to resolve conflicts, manage time, and follow rules. Emotionally, games make learners feel more confident, comfortable, and positively connected to the learning process. These benefits contribute to the overall development of the student and improve classroom dynamics.

#### **5. Effective Integration of Games in the Classroom**

For language games to be effective, they must be carefully selected and aligned with lesson objectives. Teachers should consider learners' age, proficiency level, and needs. Clear instructions, time limits, and appropriate group sizes are essential for maintaining order and maximizing learning outcomes. When used strategically, games can transform the classroom into a dynamic environment where language learning happens naturally and efficiently.

**Conclusion:** Language games are an indispensable component of English language teaching. They enhance motivation, reduce anxiety, promote communicative competence, and develop linguistic skills more effectively than many traditional methods. Additionally, games contribute to the social and emotional growth of learners and make the learning process enjoyable. When thoughtfully implemented, language games enrich the teaching process and significantly improve learning outcomes. For these reasons, teachers are strongly encouraged to integrate a variety of language games into their English lessons.
